

NMNC Interim Management Framework Award

News Release

Linea Awarded to the Non Medical Non Clinical (NMNC) Interim Management Framework (RM971) by the Crown Commercial Service.

Complex Change specialist, Linea Group, has been awarded to the NMNC Interim Management Procurement Framework agreement by the Crown Commercial Service.

The Framework is the principle EU compliant procurement route for NHS and other Government organisations seeking to access temporary, interim and contract resource.

Linea today announced that it has been approved to provide Management & Executive resource under the framework agreement.

The approval means that the NHS and other public sector organisations will now be able to procure services directly from Linea under the Corporate Services Category.

Linea Associates is the solution for clients requiring interim Restructuring, Turnaround, Transformation and Continuous Improvement resource to enhance client capacity and capability in supporting project / programme management and delivery. Our comprehensive service enables us to provide clients with a single solution to short and medium term resource challenges, across the professional hierarchy.

Linea Group CEO, Ian Chambers said, 'The NHS and the wider public sector is under significant pressure to improve quality, increase productivity and reduce structural cost. Organisations often do not have the capability or capacity within their existing teams to manage complex change programmes of this nature. They would much rather hire specialist interim managers on an 'as required basis' to lead specific programmes of work on their behalf'.

'The framework further supports Linea in meeting the needs of the NHS and the wider public sector through the provision of outstanding interim resource; at a competitive price, in a timely, responsive and compliant manner'.
