

Linea's 4th Year Success with DOS

News Release

For the fourth consecutive year, Linea has been successful in its bid for a place on the Digital Outcomes & Specialists Framework.

Complex change, Turnaround and Transformation specialist Linea, has again been successful with its bid to be part of the Crown Commercial Service's - Digital Outcomes & Specialists Framework agreement.

The framework supports the delivery of the Government Digital Strategy, through the provision of Digital Outcomes and Specialist support to the public sector. Services under the framework include research, design, build, test and delivery of software applications and digital services.

Linea CEO, Ian Chambers said, 'Digital Innovation is a vital element of service transformation and quality improvement. Technology plays a fundamental role in improving the quality and efficiency of public services'

'We are delighted to have been awarded to the latest

version of DOS. The framework is designed to help the public sector buy, design, build and deliver bespoke digital solutions and services. It enables us to continue to provide our specialist and complementary solutions portfolio to public sector clients, seeking to use innovation to drive efficiency and quality improvement.'

If you would like to find out more about the services we offer under the DOS framework, please contact a member of the team who will be happy to help.
